Summary

MSc Computer Science graduate from Trinity College Dublin with a solid foundation in data structures, algorithms, object-oriented design and relational databases. Experienced in building full-stack web applications, writing backend services in Python and Node.js, and working with modern frontend frameworks. Practical builder with freelance and startup experience turning business requirements into working software. Applied for Stamp 1G.

Experience

Ananda Stores Madurai | *Freelance Web Developer*

Feb 2026 - May 2026

- Built a bilingual English/Tamil B2B catalogue web application using Node.js, Express.js and PostgreSQL to manage product listings and inventory details.
- Implemented backend REST APIs, user authentication, file uploads and database queries, deploying the application to cloud hosting.
- Worked directly with the store owner to understand daily business needs and turn them into catalogue and user management features.

Thagai | *Founder's Office Intern*

May 2026 - Aug 2026

- Worked on technical product development, product architecture, website design and investor presentations for an early-stage coordination platform.
- Turned early product ideas into working wireframes and functional website features in a fast-moving startup environment.
- Handled changing technical and product tasks based on immediate business priorities.

Young Indians (Yi) - Yi YUVA REC | *Web Development / Automation*

[\[Live Site\]](#) Aug 2023 - Oct 2023

- Developed most of the chapter website using HTML, CSS and Bootstrap to display events, student registrations and chapter updates.
- Built a UiPath workflow to standardise applicant data and automate personalised interview messages for around 500 applicants, reducing manual effort from hours to 15 minutes.
- Organised applicant data into clean tabular records so the automated process could run reliably for subsequent student recruitment cycles.

Projects

TableSync | *Next.js, TypeScript, React, PostgreSQL, Supabase, WebSockets*

[\[Live Demo\]](#)

- Built a multi-user web application for group dining that handles restaurant voting, live order tracking, bill calculation and payment settlement.
- Used WebSockets to keep state in sync across connected users in real time without page reloads, and designed the PostgreSQL schema to manage shared session data.

Need to Know | *Python, FastAPI, SQLite, Pydantic, Slack SDK, TypeScript*

[\[Live App\]](#)

- Built an audience-aware Slack bot using Python and FastAPI that searches internal documentation using SQLite FTS5 lexical retrieval over Slack Socket Mode.
- Added deterministic policy checks and an LLM classification gate to prevent unsafe responses, testing the logic across 40 standard test cases and 8 injection probes.

Dissertation - Reinforcement Learning in Tic-Tac-Toe | *Python, Q-Learning, Sarsa, DQN, Minimax*

- Ran 216 experimental training runs to evaluate Q-Learning, Sarsa and DQN against a Minimax baseline across different training setups and player positions.
- Debugged a recursive Minimax cache mutation issue by isolating board state copies, and wrote Python verification scripts to confirm evaluation results.

Skills

Languages: Python, Java, JavaScript, TypeScript, SQL, C, C#

Frontend & Web: React, Next.js, HTML, CSS, Bootstrap, WebSockets, REST APIs, Node.js, Express.js, FastAPI, Flask

Databases & Storage: PostgreSQL, MySQL, SQLite, MongoDB, Supabase

Tools & Platforms: Git, GitHub, Docker, Docker Compose, Linux, AWS (EC2, S3, RDS), UiPath Studio

Core Computer Science: Data Structures, Algorithms, Object-Oriented Programming (OOP), Unit Testing, Debugging, System Design Basics, SDLC

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

Education

Trinity College Dublin - MSc Computer Science - Data Science

Sep 2025 - Sep 2026

Rajalakshmi Engineering College - B.E. Computer Science and Engineering

Oct 2021 - May 2025

Certifications

IBM RAG and Agentic AI Professional Certificate - Coursera

[\[Credential\]](#)

Introduction to MongoDB (For Students) - MongoDB

MongoDB Basics - ICT Academy Learnathon - MongoDB

Leadership

- Yi YUVA REC - Chair, Sports Vertical: Organised student volunteer activities and community events.
- Cultural Fest Lead: Managed outreach and communication for a college festival team.
- Student Mentoring: Helped junior students understand data structures, algorithms and coding problem-solving.
